

uniDECOchip

DECORATIVE PANELS

UniDECO chip is a wood based panel finished with a decorative melamine layer and suitable for general use in dry spaces, in accordance with service class 1 according to standard EN 14322.

- ✓ UV resistance
- ✓ Scratch-resistant surface
- ✓ Hygienic surface
- ✓ Splash-proof surface
- ✓ Easy to clean
- ✓ Perfect adhesion of melaminated paper to the chipboard
- ✓ Wide choice of designs and surface structures

Description

UniDECO Chip is a three-layer board with a good density core and a level sanded surface layer of fine particles on the top and bottom sides of the board surfaces. A decorative melamine layer with stylish surface structure is pressed on top of these layers under high pressure and at a high temperature. The melamine process binds the decorative sheet permanently to the chipboard. **UniDECO Chip** is used for many applications in the furniture and interior construction industry.

Range and options

Unique vertical integration within **UNILIN, division panels** means you have a wide range of options for **UniDECO Chip**.
